

Building construction in 45 seconds

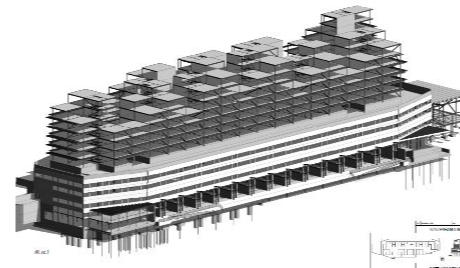

KE gruppen works with all types of building structures. Everything between new constructions to rebuilding and extensions. We also have several meritorious references regarding over-building where we let modern technology meet old tradition.

Since the establishment 1986 we have been able to construct a big amount of buildings in Sweden. During these past thirty years we have also built a large resource of knowledge and expertise in building construction.

- Construction calculations
- Advanced analysis
- Drafting in CAD/BIM
- Advisory Consultation & building preservation
- Constructional investigations
- BAS –P

Our clients are building contractors, construction, real estate and project management companies, architects, industrial companies, municipalities and other technical consultants.
